R+D+i Policy

The EDERTEK R+D+i policy is based on the following principles:

- Elevate Technology Watch, Benchmarking and collaboration agreements with our partners as a basis for *market-oriented* Technology Foresight to identify future needs in advance.
- Establish close, valuable relationships with the engineers of our partner-users' customers in order to identify their needs and collaborate in the development of their products from the earliest stage.
- Identify partner-users' technological needs in the development of their industrial activity.
- Carry out R+D+i projects and transfer technology to partner-users to achieve robust, competitive, reliable processes.
- Develop projects in line with established procedures, systematise the preparation of documentation and data collection.
- Establish access to project information as one of the pillars of knowledge management.
- Train and prepare people, promote multidisciplinary teamwork by encouraging creativity and contributions of potentially valuable innovative ideas.
- Create stable *agreements* with Technology Centres, Universities and other organisations in order to develop new technology, knowledge and attract talent.
- Use the resources and assistance available through different public entities to help *finance* technological projects.
- Promote the protection of our developments and technological know-how.
- Comply with all applicable requirements and continuously improve our R+D+i management system.
